Conducted user tests. Made audits of several websites and e-commerces. Provided user journey feedback for new sketches. Participated in briefs and communicated with customers on my own.

Aug 2022 - Sept 2022
Gothenburg

Projects

DataTjej

DataTjej is a Swedish non-profit organization that works to inspire more women and non-binary to start their careers in IT and data. And to unite those who are already working or studying within IT/Tech. We have around 1346 members now and we wish to continue growing.

In my role, I am responsible for DataTjejs contacts with different companies in Gothenburg, aiming to organize events, where we bring together girls and technology.
